## **2026 Swarm and Hive Removal**

Every swarm season the County of Ventura Department of Agriculture/Weights & Measures receives multiple calls from the public regarding feral swarms and hives of honeybees in unwanted locations such as attics, sheds, backyards and trees. The VCAWM maintains a list of professional beekeepers who would like to offer a service to the public by removing these feral bees as an alternative to using a pest control service. VCAWM provides this list to members of the public when they receive complaints regarding unwanted swarms on their properties.

If you are a professional beekeeper and would like us to provide your contact information to any interested member of the public regarding bee removal within Ventura County. Please provide your company's name, contact phone number, areas you'd prefer to provide service; and return this form to:

County of Ventura Department of Agriculture/Weights & Measures  
555 Airport Way Suite E  
Camarillo, CA 93010

Company: \_\_\_\_\_

Phone Number: \_\_\_\_\_

Preferred work region (cities, areas, or "County Wide"): \_\_\_\_\_
